

Ferry Ramp Update, July 14, 2015

On Saturday, July 11, the contract for ramp painting was awarded by the Board to Massana Construction of Gig Harbor; Long Painting is the subcontractor.

Work will begin on Wednesday, September 9 following the Labor Day weekend, and is to conclude no later than October 13, 2015, 35 days after it begins.

All timbers will be removed and replaced during this ramp maintenance job, and the ferry will be out of service for vehicle traffic for the duration of the work. Foot passenger only access will be available most of the time. During the actual painting, there will be no ferry access at all. Those painting weeks are Monday to Friday, September 14-18, and Monday to Friday, September 21 to 25. The attached color coded calendar of ferry availability may be something you want to print off.

The northernmost dock at North Beach will be reserved for the painters, who will come to the island by small boat. The required area will be marked off with signage. Please leave that area free for the contractors boat. Boats tied up in the reserved area will be moved to another spot.

There may be changes to this schedule during the project. These changes will be communicated via email, island website, and the whiteboards on either side, as quickly as possible.

We are discussing options for trash pickup with American Disposal.
