## High Tides and Wind

High tides will accompany the weekend windstorm and create storm surges and flooding. Flooding will occur at North Beach and at the mainland parking lot. If your vehicle is parked at the mainland lot, consider moving it immediately to higher ground.

In addition, high tides and storage surge may create conditions that make it impossible to run the ferry for at least a few hours. It is entirely up to the captain to use his judgment as to whether it is safe to run the ferry.

We'll put out notices as we get them.

Thank you.
