

10/12/20 - Ferry to Leave the Shipyard Early Tomorrow Morning

The shipyard found several valves that had not been re-opened after work was done, this caused the problem. The ferry is now running as it should. The crew had a long day today, they will spend the night and bring the ferry back, leaving early in the morning.

As a result the ferry will leave and get through the locks before 8:00 a.m. ETA will be later afternoon.

More information will be shared as we become aware.
