

## **Island Manager Report February 13, 2021**

### **Administration**

HMC will soon welcome a new standby ferry employee, Captain Marie Pavlovich. Marie applied for a standby deckhand position. With her mariner credentials she will also be a standby Captain. She has over 20 years of experience ranging from work on 240 car ferries to an oil spill recovery vessel.

Depending on snow levels, you may see her visiting the ferry today.

### **Roads**

HMC Roads are managed by the Roads Committee and the Island Manager. The roads are fragile and require care from pre-approved sources to ensure agreed upon approach to maintain.

In the event of snow HMC has contracted with an island resident to plow ferry hill. There should be no cars parked on ferry hill to allow for this work. In addition, there is No Parking along ferry hill, at any time, except in the designated short term spots near the ramp. Most of the sides of ferry hill are private property.

Last weekend between Saturday and Sunday there was damage done by an unknown person that required serious sudden repairs. There was damage on Maple and East Madrona that will require additional grading time to repair. Also, there was debris dumped in the ditches hindering the flow of water, the berms left on the side of the roads forced water to run down the road instead of flowing into the ditch. Gravel was scraped off the road into the grass and debris piled on private property. There is also damage to an embankment causing part of it to collapse into the ditch. Some repairs were made Wednesday, however there are other areas on the island that will require HMC's contractor to come out to assess and make right.

Please let the island manager know if you saw and can identify someone between Saturday and Sunday out with road equipment.

**Legal Liaison:** There are 19 delinquencies; 7 with the attorney's office

### **Departments/Committees**

**Maintenance:** Gary Wanzong – To report
