

The first regular Board meeting of the New Year will be held January 9 at 10 a.m. at the Community Building. At that time, the Board will hear a presentation by PND Engineers regarding replacement of the ferry dolphins. Dolphin replacement should be the last of the big infrastructure projects that HMC has faced in the last several years.

PND will report on the result of soils testing on the mainland and island sides, and make a presentation of drawings for alternative concepts, showing a general plan and profile of the dolphin concept, plus a rough order of magnitude cost estimate.

The object of this presentation is to make an informed decision to move forward with one or more concepts. PND will then prepare an alternatives analysis and final findings report to HMC with recommendations. This final report will be made in early spring 2016.

Please plan to attend this presentation if you interested. Thank you.

Happy New Year....may your year be filled with peace and prosperity!
