

## **Summertime Key Peninsula Highway Detour/Delay Information**

**You may want to allow an additional 10+ minutes to reach the ferry this summer, on weekdays.**

Pierce County has begun a project to improve the intersection of Key Peninsula Highway/Cramer Road/Olson Drive.

According to the Pierce County Project Manager, "No road closures will be allowed for this project except at the discretion of the Engineer (there are no planned closures at this time and no requests).

The existing asphalt roadway shall be left in place throughout the limits of the project until the Contractor is ready to begin final roadway grading and surfacing operations. This is expected to occur in late September. Two-way or one-way alternating traffic shall be maintained at all times during the life of the project.

Delays for one lane alternating traffic or similar approved traffic control operations should not exceed 10 minutes. If this occurs, please advise us via the project inspector on site or this office. The 10 minute rule should not be taken as an absolute, but will be a general expectation. We'll provide public notifications departing from the above should it become necessary. "

More information can be found at the County website below:
