

The Board would like to address an issue that has surfaced relative to individual websites that are created independently in an effort to share information about our little island. Often times those websites are used for purposes other than HMC's best interests. It's important to remember that the HMC Management website is the only official website for Herron Island and its membership. We are not able to control information that is posted on the worldwide web by others, nor do we sanction any information that may be posted by those parties. Unless specifically stated by official notice of HMC Management, this is the only website approved by HMC for the benefit of HMC and its members.
